Highly skilled and dedicated Java Developer with expertise in Oracle, HTML, CSS, WordPress, JavaScript, and SQL. I have a strong passion for creating user-friendly web applications and possess a proven track record of developing responsive and visually appealing user interfaces while optimizing site performance. With excellent analytical and problem-solving skills, I thrive in team environments and contribute valuable insights to web development projects. Committed to delivering high-quality solutions, let's collaborate and create exceptional web experiences.

PERSONAL PROJECTS

1] Speak And Listening Voice System (12/2022 - 02/2023)

- Speak and Listening Voice System: Developed a voice recognition and response system using HTML, CSS, and JavaScript. Leveraged the Web Speech API for voice recognition capabilities. Designed the system to accurately recognize spoken commands and provide pre-determined actions or phrases as responses. Contributed to front-end development using HTML, CSS, and JavaScript, creating an intuitive and seamless user experience. Demonstrated proficiency in integrating cutting-edge technologies for voice-enabled applications. Enhanced user accessibility and interaction through innovative voice-based functionalities. The Speak and Listening Voice System represents my expertise in HTML, CSS, and JavaScript, showcasing my ability to create interactive and responsive web applications.

2] Chat Bot (11/2022 - 12/2022)

- Developed a dynamic chat bot project utilizing Java, HTML, CSS, and JSP (JavaServer Pages) technologies. Created an interactive and user-friendly interface for seamless communication between users and the chat bot. Implemented intelligent algorithms to understand and respond to user queries, providing personalized and accurate information. Leveraged HTML and CSS to design an aesthetically pleasing user interface, ensuring a smooth user experience. Utilized JSP to integrate server-side processing for dynamic content generation. This project showcases my proficiency in Java, HTML, CSS, and JSP, as well as my ability to create intelligent and responsive web applications.
